This Office Action is responsive to the applicants' amendment filed on June 24, 2005.

Claims 6 and 7 have been amended. Claims 1-5 and 9-11 have been canceled. Claims 12-21 have been added. Overall, claims 6-8 and 12-21 are pending in this application.

The amendments and arguments presented by the applicant have been duly noted. In view of such, the previous rejections in the first Office Action have been withdrawn. However, an updated search and further review of the prior art of record, has prompted the new non-final rejections presented below.

Claim Rejections - 35 USC → 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States

Claims 6, 12, 16, 18 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Grant (Publication Number 3,320,828).

Regarding claims 6, 12, 16, 18 and 21, as shown in Figs. 1 and 2, Grant discloses an integrated speed reducer and gerotor pump assembly comprising: a motor (1) providing torque at an elevated speed; a speed reducer (not numbered; however, clearly seen in Fig. 1) configured for receiving torque at an elevated speed and increasing the torque to a reduce speed, a gerotor pump (16, 17) coupled with the speed reducer for receiving the torque at the reduce speed for pumping fluids; a housing (3) for hosting both the gerotor pump and the speed reducer; the speed reducer further comprising: a sun roller (6) having an input end coupled with the motor (1)

Art Unit: 3748

and having a first raceway; a planetary roller (7) having a second raceway; and an outer ring (5) having a third raceway eccentric to the first raceway. Note that in claims 6 and 12, the limitation "so that the second raceway.... b etween the sun roller and the outer ring" is a functional implication. However, they are deemed not to impose any structural limitations distinguishable over the Grant device, which is certainly capable of performing as a speed reducer if so desired. In other words, the recitation of the functional implication of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

## Allowable Subject Matter

2. Claims 7, 8, 13-15, 17, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Communication

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theresa Trieu whose telephone number is 571-272-4868. The examiner can normally be reached on Monday-Friday 8:30am- 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion can be reached on 571-272-4859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/682,233
